PRODUCT CATALOGUE

AC DUCT WORK TRIANGLE

We have invented an instant method of recognition , in both emergency and routine maintenance situation, through simple colour coded equilateral triangles which helps identify Duct Work easily

These are available in 150mm size and are made of self adhesive stickers Further additional informations could be provided by printed letters or numbers. The pointed ends of the triangles indicates the direction of the air movement

Duct work triangles available with printing

PIPE IDENTIFICATION BANDS

FOR PIPE LINE IDENTIFICATION

The identification bands helps identify the contents of each and every pipe that exists in any Facility, this means marking the pipe at regular intervals, with instantly recognizable signs

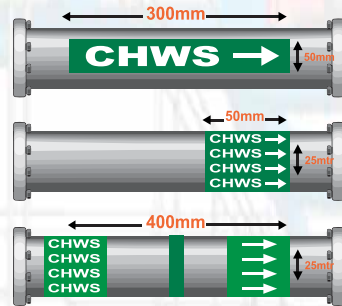

These colour coded METAL AND PVC pipe ID. bands are manufactured in the U.A.E. in accordance with (Bs 1710 - 4800) colour references

We are supplied in 25 Meter rolls with self adhesive

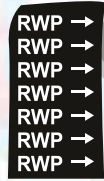

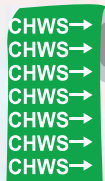

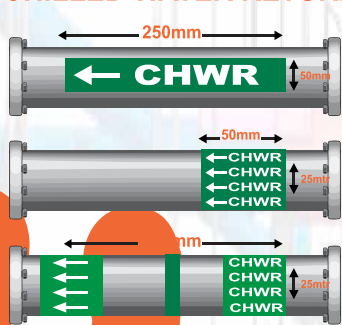

Base Colour (Approx 150mm)	Base Colour (Approx 150mm)	Colour Code Identification	Pipe Contents

<p>TREATMENT FOR ELECTRIC SHOCK</p> <p>ARTIFICIAL RESPIRATION (KISS OF LIFE) Mouth to mouth method</p> <p>ACT IMMEDIATELY</p> <p>1. STOPPING YOURSELF If patient collapses due to ELECTRIC SHOCK, switch off power or break the circuit. Use an insulator or some other non-conducting material to disconnect the patient from the wires or source of electricity.</p> <p>2. Start artificial respiration if the patient is not breathing and KISS OF LIFE METHOD.</p> <p>3. METHOD Lie face down on back and if possible on a table or floor. Remove any obstruction from the mouth. Support the corners of the neck and press the top of the head so that it is tilted backwards. Seal the mouth. Open the casualty's mouth together with your mouth. Breathe your own breath into mouth. Repeat this until you can feel the chest fall. Repeat and continue to breathe at your natural rate of breathing. Continue to give artificial respiration until natural breathing is restored or until medical aid arrives.</p> <p>4. When the casualty is breathing, Place in a recovery position. Use appropriate first aid until medical aid arrives.</p>	<p>معالجة الصدمات الكهربائية التنفس الاصطناعي (قبلة الحياة)</p> <p>تصرف فوراً</p> <ol style="list-style-type: none"> ١. توقف فوراً إذا انقلب المريض بسبب صدمة كهربائية، اقطع التيار الكهربائي عن المريض أو كسر الدارة الكهربائية. استخدم عازل أو مادة غير موصلة كهربائياً لقطع المريض عن الأسلاك أو مصدر الكهرباء. ٢. ابدأ بالتنفس الاصطناعي الفموي إذا لم يتنفس المريض أو استخدم قبلة الحياة. ٣. الطريقة اجلس على الظهر أو على البطن أو على الطاولة أو على الأرض. انزع أي عائق من الفم. دعم زوايا الرقبة وتدفع أعلى الرأس حتى تكون الرقبة مائلة للخلف. سد الفم. افتح فم الضحية مع فمك. تنفس هوائك في فم الضحية. تكرر هذه العملية حتى تشعر أن الصدر يهبط. تكرر وتواصل التنفس الطبيعي حتى يصل الإسعافات الأولية. تواصل التنفس الاصطناعي حتى يعود التنفس الطبيعي. استمر في التنفس الاصطناعي حتى يصل الإسعافات الأولية أو حتى يعود التنفس الطبيعي. ضع الضحية في وضعية الاسترجاع. استخدم الإسعافات الأولية المناسبة حتى يصل الإسعافات الأولية.
